PROFESSIONAL SUMMARY

Versatile full stack developer with over 3 years of experience building fast, scalable web applications. Transitioned from a commerce background into software development through an intensive bootcamp. Skilled in designing clean, efficient backend systems and dynamic frontend experiences. Adept at solving real-world problems using job queues, microservices, CRDTs, and cloud technologies. Proven ability to improve performance and scale systems reduced API latency by 40% through query optimization, and helped scale worker job throughput by 300% with improved queue handling. Eager to contribute to fast-paced, product-driven teams focused on backend or full-stack development—especially those building scalable systems, real-time applications, or collaborative platforms.

PROFESSIONAL EXPERIENCE

Sheshi.ai, SDE-2 07/2024 – 06/2025 | Bengaluru, India

- Led development of a cloud-based accounting/reporting platform with automated ledger classification APIs.
- Transitioned core application from monolithic to microservices architecture, improving scalability and deployment.
- Integrated third-party accounting tools for seamless financial report generation.
- Mentored junior developers and conducted regular code reviews.

Sheshi.ai, SDE-1 05/2022 – 06/2024 | Bengaluru, India

- Contributed to full-stack development of core features for the accounting platform using React, NestJS, and PostgreSQL.
- Implemented key modules such as user access control, data import pipelines, and report generation.
- Collaborated with product and design teams to deliver efficient and user-friendly UI components.
- Wrote integration and unit tests, participated in agile ceremonies, and continuously improved the codebase through refactoring.
- Optimized report generation process, reducing rendering time by 30%.
- Created internal documentation and onboarding guides to speed up team integration by 0%.

TECHNICAL SKILLS

Frontend — React | Next.js | Vue.js | Nuxt.js | HTML | CSS | JavaScript | TypeScript, **Backend** — Node.js | NestJS | Express.js | REST APIs | WebSockets | Yjs, **Databases** — PostgreSQL | MongoDB | SQL, **DevOps / Tools** — Docker | Redis | Git | AWS (EC2, Lambda, S3, CloudWatch) | BullMQ, **Other** — CRDTs | Job Queues | Microservices | Agile/Scrum

PROJECTS

Job Queue & Worker System, *Stack: NestJS, BullMQ, Redis, PostgreSQL, Next.js*

- Designed and implemented a distributed background job system with support for retries, priorities, and delayed execution.
- Used Redis for real-time job state tracking and PostgreSQL for persistent job logs and outputs.
- Scaled system to handle over 50,000 jobs per day with a 99.98% success rate.
- Built a monitoring dashboard in Next.js to view job lifecycle (pending, active, completed, failed).

Real-Time Collaborative Whiteboard Tool, *Stack: Yjs, WebSockets, NestJS, Next.js*

- Developed a collaborative document editor using Yjs for CRDT-based synchronization.
- Implemented presence system to track users' cursor positions and edit states in real time.
- Achieved sub-100ms sync latency across 3+ regions with WebSocket optimizations.
- NestJS backend handles authentication, access control, and persistence.
- Handled cursor tracking, user presence, and document versioning with real-time updates.

EDUCATION

Masai School, *Full Stack Web Development*

09/2021 – 04/2022

Completed 1000+ hours of hands-on coding. Built and deployed + full-stack projects under mentorship. Gained practical experience with Git, CI/CD, pair programming, and agile workflows.

University of Calcutta, *Bachelor of Commerce (Finance)*

2017 – 2020

LANGUAGES

English

Bengali

Hindi
